

ARE YOU
LOOKING TO
START OUT
AT METALL?

**reasons
we're
different**

We Started in a Garage

Fry Fabrications started in a garage in 1999 when Jim Fry saw a need to build custom, high-quality displays, carts and kiosks to help companies stand out from their competition. Since then, the company has quickly grown to provide innovative metal design for such brands as Monster Energy Drink, W Hotels, DC Shoes and so many more.

Custom Is a Philosophy

Custom isn't just a word at Fry Fabrications. It's our way of working. Every design and every fixture is produced with the client's brand in mind. The result is highly customized work that stands out and differentiates the brand when consumers are looking to buy.

We Move Fast

Whether it's for an estimate, prototype or project, we pride ourselves on moving quickly to get the job done so you can focus on your brand. Our team of designers and engineers are highly trained to produce high-quality work fast.
